🎓 Education

Dhaka International University

Dhaka, Bangladesh

Bachelor of Science (B.Sc.) in Computer Science and Engineering (CSE)

2023 - 2027– (Expected)

Relevant Coursework: Programming Fundamentals, Data Structures, OOP, Mobile Application Development, Database Systems, Software Engineering, Software Development Management, Computer Networking

🧰 Experience

Flutter Developer (Personal Projects)

2024 – Present

- Developed multiple Flutter applications with responsive UI and REST API integration.
- Built scalable mobile applications using clean architecture and state management solutions such as Provider and GetX.
- Implemented Firebase authentication, JSON parsing, API handling, and reusable widget structures.
- Focused on performance optimization, clean UI/UX, and maintainable code practices.

📁 Projects

Crafty Bay E-Commerce Application

Feb 2026 – Apr 2026

GitHub Repository

- Developed a full-featured e-commerce application with authentication, cart, and product management.
- Integrated REST API and implemented responsive modern UI design.

AI Chatbot

May,21,2026

GitHub Repository

- Developed an AI-powered chatbot application using Flutter with Google Gemini 3.1 Flash Lite model.
- Integrated OpenRouter API for real-time AI response generation and conversational messaging features.
- Implemented clean UI design, reusable widgets, and responsive chat interface architecture.

Task Manager using Full API

Dec, 2,2025

GitHub Repository

- Developed a full-featured task management application with authentication, task CRUD operations, and profile management.
- Implemented Provider state management for scalable and maintainable application architecture.

Recipe Book App

Apr,12,2026

GitHub Repository

- Built a Implement recipe search and detailed view application with API integration and dynamic data loading.
- Designed reusable widgets and responsive layouts for better user experience.

Local Event Finder App

May,18,2026

GitHub Repository

- Developed an application to discover local events using Dummy Data(never API yet).
- Implemented clean architecture and responsive event listing interfaces.

bKash Dummy App

May,12,2026

GitHub Repository

- Developed a bKash-inspired mobile home application UI using Flutter.
- Implement Login screen and expand Home screen feature sections and clean user interface architecture(without API Integration).

To-Do App with GetX

May,7,2026

GitHub Repository

- Created a task management application using GetX state management.
- Implemented responsive UI and optimized simple task management workflow.

Weather App

Dec,24,2025

GitHub Repository

- Developed a real-time weather forecasting application using open source API of Open-Meteo
- Displayed dynamic weather data with responsive mobile interfaces.

Skills

Languages: Dart, Java, C, C++, HTML, CSS

Frameworks & Technologies: Flutter, Firebase, REST API, JSON Parsing, Provider, GetX

Tools: Git, GitHub, Android Studio, Postman

Concepts: OOP, State Management, Clean Architecture, Responsive UI Design, API Integration

Certifications

Fundamental Java Course

2025

[View Certificate](#)

Issued by Programming Hero
